

Company Profile

ULTRA4 has been founded in July 2006 by Dr.-Ing. Kostas Tzerras and Ing. Jesse van Slooten. Building on 15 years of its core team's experience in the ICT business, the company aims to assist consumers and businesses to create **better and affordable software designed for the future**; i.e. software that provides the following fundamental characteristics:

- Respects the customers' investment
- Protects the existing investments
- Easily adopts to changing external conditions
- Minimizes human intervention
- Is accessible from anywhere
- Is absolutely secure

The main focus of the company has been the creation of an innovative **business software development platform** based on Model Driven Architecture principles. This platform enables ULTRA4 to build **highly scalable and cost efficient IT solutions at a faster pace** than its competitors and builds the basis of the company's product line.

ULTRA4 offers currently the following **product line**:

- **UltraCore:** Environment for the development of multi-tiered Rich Internet Applications based on Model Driven Architecture principles, featuring a sophisticated GUI on top of the newest technology standards (AJAX)
- **UltraTelecom:** Platform for building telecommunication-enabled applications, which implement multi-channel access via Internet, Phone, SMS, E-mail, etc.
- **UltraIntegration:** Platform for integrating heterogeneous systems, applications and services

These products are targeted to companies, organizations and self-employed that aim to deliver advanced business applications and may be combined with **integrated packages of services** in order to accomplish **clear choices for quality and turnkey solutions**.

ULTRA4 furthermore **offers end-to-end customized software development** based on the products above, **near-shore outsourcing services** as well as **consultancy and training on outstanding IT technologies and best practices**.

ULTRA4 has its seat in Thessalonica Greece, but it focuses on the international IT market. The location of ULTRA4 in Greece allows it to **combine highly skilled personnel with low cost of labor**, and gives ULTRA4 a competitive advantage in the international IT market.

The company has customers in Germany, Greece and Cyprus and is looking for new partnerships in various European countries.

With a team in disposal of broad know-how in the areas of Rich Internet Applications, Portal Sites, Content- and Knowledge Management Solutions, Telecom Applications and System Integration, **ULTRA4 is the ideal proactive partner for achieving strategic and competitive advantages by utilizing outstanding ICT technology at affordable prices.**
